Balanceline

For Landscapes and Golf Courses

GENERAL INFORMATION

BALANCELINE 14-5-14 provides a balanced source of nutrition, complete with essential micronutrients that plants require to reach optimum health and appearance. It is an excellent, high quality, balanced product used for general maintenance on greens, tees and other high quality turf areas. Applications of BALANCELINE 14-5-14 will help maintain excellent colour without the excessive growth associated with high rates of nitrogen. A proprietary chelating method keeps micronutrients free in the soil and available to the plant.

GENERAL USAGE

For use on all turf and ornamentals to maintain healthy rates of growth and provide micronutrients that are commonly deficient in plants. Applications should be made to actively growing turf and ornamentals, preferably during periods of high humidity (early morning and late afternoon). Avoid spraying during periods of severe stress, such as drought and high temperatures. Do not water for at least eight hours after application for optimal results.

GUARANTEED MINIMUM ANALYSIS:

TOTAL Nitrogen (N)	14.0%
Phosphorous (P)	5.0%
Potassium (K)	14.0%
Sulphur (S)	1.4%
Iron (Fe)	0.11%
Magnesium (Mg)	0.07%
Manganese (Mn)	0.07%
Boron (B)	0.02%
Copper (Cu)	0.02%
Zinc (Zn)	0.02%

KENTUCKY BLUEGRASS, RYEGRASS, AND FINE FESCUES – Apply 6 fl. oz (180 ml) per 1000 sq. ft. (100 m²).

ANNUAL BLUEGRASS AND BENTGRASS – Apply at 6-8 fl. oz (180 ml) per 1000 sq. ft. (100 m²).

INJECTION – 600-800 ppm per month or as needed to maintain colour.

Bi-weekly applications through the growing season will usually provide the best results.
