

Promotes Roots... Triggers Crop Defenses

ANALYSIS (0-27-6 WITH 3.8% Zn & 1.5% Mn)

WHAT IS IT?

- > Seed dressing for application onto cereals, oilseed and pulses prior to seeding.
- > Unique formulation with high concentrations of Phosphorus, Potassium, Zinc and Manganese.
- > The Gel Rheology Technology™ keeps the highly concentrated product suspended and helps with seed adhesion and drying out.

WHEN & WHY USE IT?

- > To help reduce the effect if cold and wet conditions and when seeding into a dry soil.
- > When seeding into high pH soils, heavy manure land, soils with low organic matter.
- > When farming sandy and light-textured soils.

WHAT TO EXPECT?

- > Enhanced secondary root development which maximizes the uptake of all nutrients.
- > Primer Mn® triggers the crop's natural defenses (i.e. Phytoalexins), which in conjunction with the fungicide seed treatment:
 - > improves the quality and grade of the grains;
 - > preserves yield.

Application Guidelines

Cereals: 3 mL/Kg of seed or 122 bu per 10 L jug; 410 L per 5000 bushel bin.

Oilseeds: 6 mL/Kg of seed or 73 x 50 lbs bags per 10 L jug.

Primer Mn® can be used alone or in combination with other seed treatments. Check the best option for your targeted combinations (see compatibility charts).

Primer Mn® can be diluted with water for a more uniform coverage onto the seed. Dilution improves the dry down time.

Primer Mn® should NOT be used with liquid Rhizobia on pulses.

It is highly recommended to wash the seed treatment equipment with water after use.

The product is available in 10 L jugs, 450 L and 1000 L IBC's.
