

**Muscle Up™**

# The Protein Power Shake for Your Crop!

**ANALYSIS (15-9-5 + MICROS PACKAGE)**

## WHAT IS IT?

- Muscle Up is formulated with a high-quality suspension of NPK achieving a guaranteed analysis of 15-9-5 and a tailored micro-package.
- Its customized micronutrients package fits the needs of the crops at their early stages of growth and development.
- The product is available in 10L jugs, 450L and 1000L IBC's.

## WHEN & WHY USE IT?

- With its high nitrogen level, Muscle Up offers the best foliar solution to fulfill the crop's extra-nitrogen demand under stress periods.
- It improves Nitrogen uptake under poor conditions i.e., wet sandy soils, saturated heavy soils, shallow roots or at later stages in the season.
- Muscle Up provides equal amount of nutrients as dry soluble fertilizers while eliminating the handling of dry product bags.

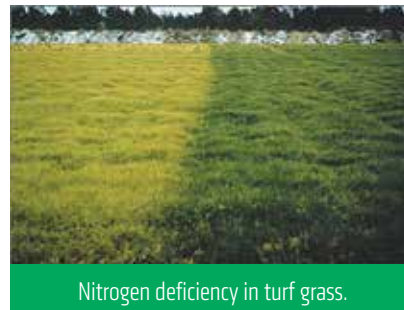

## WHAT TO EXPECT?

- Muscle Up will help to mitigate early-season stress and provide the extra nitrogen required.
- Muscle Up increases the greenness of the crop, which translate to an optimal photosynthesis and assimilation of nutrients.
- Mitigating stress and providing extra Nitrogen translates into an enhancement of production and quality.

## Application Guidelines

- Apply Muscle Up at 1.5 oz / 1000 sq feet.
- Can be combined with other fertilizer mixes and pesticides.
- A jar test is recommended especially if the desired combination has not been previously used.
- Muscle Up is suitable for use on all major field and horticultural crops and vegetables, including turf.
